

Letters to a PRE-SCIENTIST

The Opportunity

Using the power of human connection,
we demystify STEM careers and empower
all students to see themselves as future scientists.

We pair students one-on-one with people who work in
STEM for a yearlong snail mail letter exchange.

Now seeking mission-aligned companies to support our pen pal program.

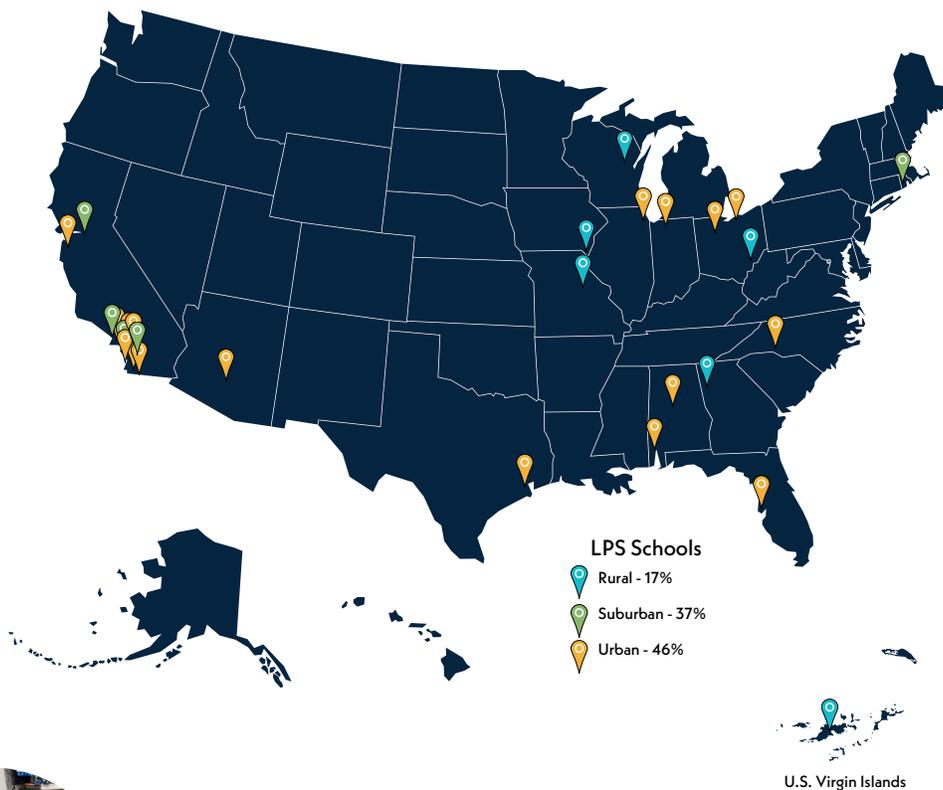

- STEM professionals all over the world are encouraged to volunteer.
- Volunteers enjoy a high-impact, remote volunteer opportunity with a low and flexible time commitment (10 hours/year).
- Volunteers exchange eight letters with a student pen pal and discuss higher education, STEM career journeys, and overcoming obstacles.
- All sponsors are featured on our website, social media, and in our newsletter, which together reach over 20,000 people.

94% of our volunteers say they want to volunteer with us again.

The Impact

This year, we will partner with 50 teachers and their 3,200 students in 15 states and 1 US territory. 100% of our schools are Title I and teachers in all 50 states are encouraged to apply.

“Something I'm interested in this year because of my pen pal is being an engineer or a person who works with genetics.” - Ruby, 7th grader in CA

1/4 of students who said they were not excited about STEM at the start of the school year expressed interest in STEM after our program.
