

Letters to a PRE-SCIENTIST

Now seeking: mission-aligned organizations
to sponsor our pen pal program

We use the power of human connection to demystify STEM careers
and empower all students to explore a future in STEM
by pairing students one-on-one with people who work in STEM for
a yearlong snail mail letter exchange.

Partners make a donation to help keep the program free for schools and receive priority volunteer spots for our pen pal program. Sponsorships range from \$5,000 w/ 10 volunteer spots to \$80,000 w/ 100 volunteer spots.

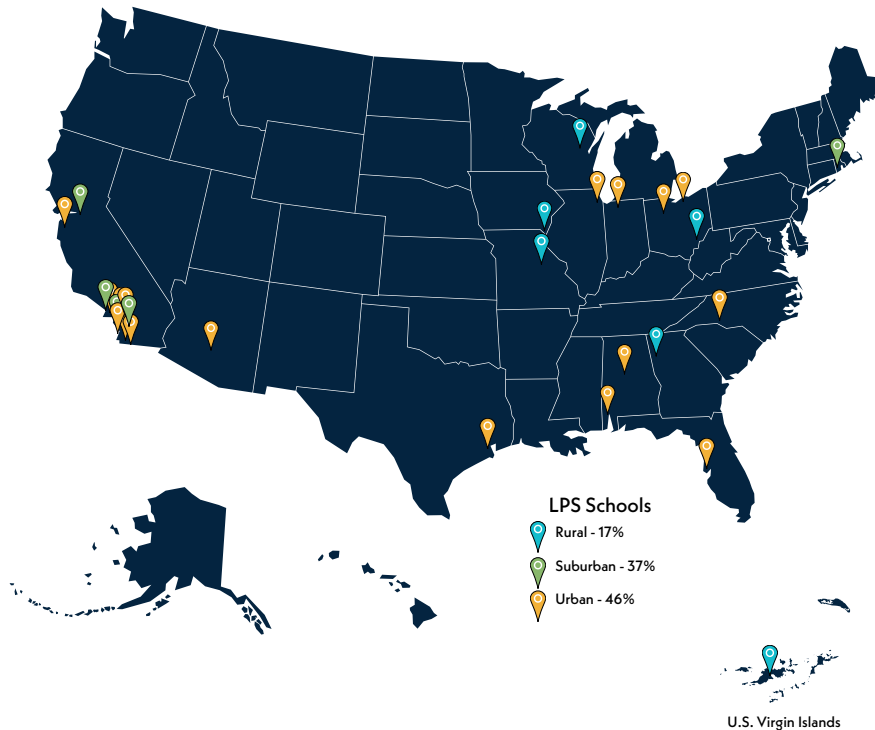

- STEM professionals all over the world can volunteer and 94% of our volunteers want to volunteer with us again.
- Volunteers enjoy a high-impact, remote volunteer opportunity with a low and flexible time commitment (10 hours/academic year).
- Volunteers exchange 8 letters with a student pen pal and discuss higher education, STEM career journeys, personal life, and overcoming obstacles.
- Volunteers receive science communication training.
- We manage volunteer logistics and follow through with a 98% retention rate.
- Sponsors are featured on our website, social media, and in our newsletter, which together reach over 25,000 people.

The Impact

Next year, we'll partner with 75 teachers and 4,500 students all over the US. 100% of our schools are under-resourced.

Here's where our 3,000 students are this year:

1 in 4 students who were not excited about STEM at the start of the school year expressed interest in STEM after our program.

"Something I'm interested in this year because of my pen pal is being an engineer or a person who works with genetics." - Ruby, 7th grader in CA

STEM professional volunteers benefit, too!

- 82% said engaging with their pre-scientist reignited enthusiasm for their work.
- 94% said writing letters improved their ability to share their work with people outside their field.
- 81% said participating in the LPS program helped their career.
